

# SCREW REMOVAL PLIERS SERIES

PATENTED TECHNIQUE

## Remove all kinds of screws, fasteners, pins, etc. easily!

**PZ-22**

**SCREW EATER**

Finally, the world-standard model of the Screw Removal Pliers!

- Vertical serrations bite and grip a screw head without slippage.
- Also good for Truss head screw. \*Truss: Lower-profile dome head
- Also ideal for situations when the correct size or type of screwdriver is not available.
- Serrated side teeth lined consecutively, inter-meshed with each other. Good for holding a thin plate securely.
- Owing to T-shaped forging handles, the handle sleeve will not twist or slip off during heavy duty use.

Vertical serrations

T-shaped handle

### Vertical Serrations (PAT.)

You can remove damaged screws in seconds. Just grip and turn!

### Inter-meshed Teeth (PAT.)

Need to hold a thin material? Get a firm grip!

### How does it work?

#### Ordinary pliers

Ordinary plier jaws are lined with horizontal serrations. When you grasp and turn a screw head with ordinary pliers, the jaws slip and the screw remains stuck.

#### "Vertical serrations"

Specially-designed jaws generate gripping power.

#### "Maximizes the friction"

Perfect fitting serrations maximize friction with no slippage.

### ■ Screw head size

Item No.	Material	Hardness	Wgt.(g)
PZ-22	Carbon Steel	HRC60±2	165

### Rust Remover (ZC-28)

Screw stuck due to rust? Try our Rust Remover to remove the rust off screws within seconds!
